U.S. TOBACCO TRADE, JULY 1976-JUNE 1977

U.S. exports of unmanufactured tobacco for the 12 months ending June 30, 1977 totaled 263,901 tons, a drop of 1 percent from those of the previous year, but value rose to a new record of \$952 million. The volume of leaf shipments continued to trend downward and the 1976/77 total was the third consecutive decline. The increasing availability of relatively cheaper leaf from competitive suppliers continued to have an adverse effect on exports.

Exports of manufactured tobacco products continued to expand and cigarette shipments led the pace with a 20 percent growth in value. Total product exports, valued at \$576.6 million, were up nearly 20 percent from a year earlier and were more than double the 1970-74 average.

The total value of all tobacco exports, including both leaf and manufactured products, increased about 10 percent to \$1.53 billion, compared to \$1.38 billion in the previous year. The value of all imported tobacco increased to \$332 million from the year earlier total of \$284 million. As a result, the trade surplus for tobacco improved by 9 percent to nearly \$1.2 billion.

Exports of leaf tobacco to the European Community (EC), the largest U.S. market, continued to falter and totaled 112,497 tons for the 12 months, compared with an average of 141,302 tons for the 1970-74 period. Larger shipments to Italy, Denmark, Ireland, and West Germany were offset by sharply lower exports to the United Kingdom, causing the EC total to fall.

Shipments of 46,456 tons to Japan were down 19 percent, falling for the first time in this decade. However, demand for unmanufactured tobacco in other Asian areas, notably Thailand, remained strong, and U.S. exports to these markets increased from 32,633 to 38,040 tons.

Despite the drop in volume, the value of U.S. tobacco exports for the 12-month period continued to increase, and the average unit value of leaf shipments climbed to \$3.61 per kilogram, up about 7 percent. However, the gain in unit value corresponded to the rate of inflation experienced in the United States over the July-June period, and represented little real gain.

Trade data contained in this circular cover the period July 1, 1976 through June 30, 1977. This time span corresponds to the old United States Government fiscal year (now October 1 through September 30), and coincides with the flue-cured and cigar wrapper crop years. Information presented here is directly comparable to that presented in past fiscal year circulars, but the term "fiscal year" has been dropped.

An examination of U.S. leaf exports by type shows shipments of flue-cured tobacco, the major export variety, dropped 2 percent to 173,124 tons. Sharply lower exports to the major United Kingdom and Japanese markets (down a total of 11,883 tons) accounted for most of the decline, and offset increased shipments elsewhere. The value of flue-cured exports reached \$722 million, as the average value per kilogram rose 8 percent to \$4.17. The share of stemmed leaf in flue-cured exports declined slightly to 64 percent.

Shipments of burley tobacco fell slightly to 31,883 tons, but remained well above the 1970-74 average of 23,369 tons. The unit value of burley exports rose 5 percent to \$4.13 per kilogram. In addition, the proportion of stemmed leaf in burley exports continued to rise, jumping to 50 percent of the total. A decline in exports to the Philippines, from a 1976 high of 3,754 tons to more normal levels of 1,778 tons, was responsible for most of the decline in volume. Shipments to the major West German and Italian markets continued to increase, with the two taking 42 percent of all burley exports.

U.S. exports of manufactured tobacco products continued to grow, and reached record levels in both value and volume. Cigarette shipments of 62,768 million pieces were up 8 percent from 1976 and 81 percent from the 1970-74 average. The value of cigarette exports jumped 20 percent to \$548 million. Shipments to the key markets of Iran and Belgium-Luxembourg continued to climb

sharply. Sales of \$189 million to these two markets accounted for 35 percent of the value of all cigarette exports. Shipments of cigars and cheroots also rose, and were valued at \$6 million. Exports of smoking tobacco, both packaged and in bulk, valued at almost \$22 million, recovered from a decline in 1976 and together totaled 6,730 tons for the 12 months.

Imports of foreign-grown tobaccos into the United States continued to decline, and U.S. duty-paid imports of 133,228 tons were down 6 percent from those of the previous year. Cigarette leaf, primarily oriental types, accounted for 62 percent of imports, followed by stems and scrap which comprised 35 percent. Flue-cured and burley imports declined for the second consecutive year and totaled 9,213 tons, 7 percent of all unmanufactured tobacco imports.

Despite the decline in volume and an increasing proportion of stems and scrap, the value of unmanufactured tobacco imports rose 15 percent to \$282 million. The unit value of imported leaf rose 40 cents to \$2.12 per kilogram. Brazil and Italy continued to increase

their relative shares of the U.S. market, while imports from several traditional suppliers including Hungary, Greece, and Turkey were off substantially. Actual arrivals of foreign-grown leaf tobacco, at 129,239 tons, followed the same general pattern as duty-paid consumption imports, but totaled somewhat less, indicating some reduction in stocks.

Prospects for the months ahead indicate a continued fall in U.S. shipments of unmanufactured tobacco. The 1977 flue-cured crop is currently estimated to be 23 percent below last year's. This fact, coupled with expected rises in the price of quality U.S. leaf, and greater availability of competitive tobaccos, will be major factors affecting future tobacco exports.

Preliminary indications, based largely on the above factors, imply that imports of foreign grown leaf will probably increase slightly.

Exports of manufactured tobacco products, particularly cigarettes, are expected to continue to trend upward as demand for American-blend type cigarettes remains strong in the major EC and Middle Eastern markets.

TABLE 1 .--TOBACCO, UNMANUFACTURED: U.S. EXPORTS BY TYPE, EXPORT WEIGHT AND VALUE,
